Summary:

Full Stack Developer with 9 months of experience building scalable web & mobile apps using MERN (**MongoDB, Express.js, React, Node.js**), Next.js, and React Native. Developed HR systems, expense trackers, and pet adoption apps with MySQL, FastAPI, Stripe integration, Redux, and Firebase in Agile teams.

Work Experience:

Full Stack Developer —**Techloset Solution**

April 2025 – Oct 2025

- Implemented Stripe payment integration for the company's flagship project Tradala.
- Improved the UI and integrated backend APIs for the Techloset My Profile Web Application.
- Worked on the Techloset Admin Panel, implementing new features and resolving frontend and backend issues.
- Updated and optimized the Techloset My Profile Mobile App, including backend logic refactoring.
- Designed and developed UI components for the Techloset Tracker System to enhance usability.
- Collaborated with team members using Git, GitHub, Jira, and followed Agile development practices.

MERN Stack Internee —**Techloset Solution**

Jan 2025 - April 2025

- **Developed full-stack web applications** using the MERN stack: MongoDB, Express.js, React, and Node.js.
- **Built and connected RESTful APIs** for dynamic frontend-backend communication.
- **Implemented CRUD operations** and managed state efficiently using React and Context API/Redux.
- **Worked on authentication features** using JWT and session-based login systems.
- **Integrated MongoDB databases** and optimized queries for performance and scalability.
- **Deployed projects** using tools like Heroku, Vercel, or Render.

Projects:

HR Management System — Full Stack | Next.js (Frontend & Backend), Redux Toolkit, MongoDB

- Developed employee onboarding, role-based authentication, attendance tracking, and payroll management modules.
- Built secure **Next.js API routes** to handle employee records, admin actions, and database operations.
Used **Redux Toolkit** for predictable state management and scalable UI updates.
- Designed reusable dashboard components with interactive data visualization.

Life Management System — Full Stack | React, Node.js, SQL

- Built a personal productivity dashboard for managing habits, tasks, goals, and reflections.
- Implemented secure login and cloud-based data storage with CRUD operations.
- Utilized Redux for state management to ensure scalable UI behavior.

Expense Tracker — Full Stack | React.js, Node.js, SQL

- Developed transaction logging with income/expense categorization and history view.
- Implemented user accounts with authentication and persistent cloud data storage.
- Created chart-based spending analytics to improve user financial awareness.

Pet Adoption Mobile App — React Native + Firebase

- Built a mobile platform for browsing pets, saving favorites, and adoption requests.
- Integrated Firebase Authentication and Firestore Database for real-time updates.
- Designed clean, reusable UI components for a smooth user experience.

Education

Bachelor of Science in Computer Science (Ongoing)

2023 – present

University of Education Lahore (Faisalabad Campus)

Skill:

HTML5, CSS3, JavaScript, React.js, Next.js, Magic UI, UIKit, Swift, Tailwind CSS, Typescript, OOP, Core Data, Redux, C++, Firebase, Docker, Git & GitHub, DSA
